Lab 27: Which instructions actually reached Claude?

Topic 3: Claude Code Configuration & Workflows · Task 3.1: Configure CLAUDE.md files with appropriate hierarchy, scoping, and modular organization

Runs on Simulator 2: Code Generation with Claude Code · Run in class

Source: Built from exam guide task statement 3.1 (no practice question covers this angle)

Commit to an answer first

A teammate says Claude keeps ignoring the test conventions. How do you organise the instructions, and how do you find out which ones reached Claude for a test file?

A. Everything in one huge file, or hidden in your home folder.

B. Project CLAUDE.md with @imports, plus rules that load by path.

Simulate the solution

```
# In the browser: open Simulator 2, then Lab 27
cd labs
uv run serve.py

# In Claude Code, from the labs folder
/lab 27

# In a terminal, from simulators/simulator-2-code-generation/
uv run simulator.py 1
```

What you should see

Claude quotes the imported standard and names the rule files in context.

Open `simulators/simulator-2-code-generation/evidence/` and find it yourself.

The answer

B. Project CLAUDE.md with @imports, plus rules that load by path.

Now change one thing

Set LAB_MODEL=claude-sonnet-5-5, rerun, and compare the result and the cost line in evidence/.
