Lab 12: The prompt forgot the $500 rule. The hook did not.

Topic 1: Agentic Architecture & Orchestration · Task 1.5: Apply Agent SDK hooks for tool call interception and data normalization

Runs on Simulator 1: Customer Support Resolution Agent · Run in class

Source: Built from exam guide task statement 1.5 (no practice question covers this angle)

The question

Arjun wants a full refund on a $780 standing desk. Automatic refunds stop at $500. Someone has edited the system prompt, and the $500 rule is gone. What still stops the refund?

A. A PreToolUse hook denies anything above $500 and redirects to escalation.

B. A refund limit that lives only in the system prompt.

Simulate the solution

```
# In the browser: open Simulator 1, then Lab 12
cd labs
uv run serve.py

# In Claude Code, from the labs folder
/lab 12

# In a terminal, from simulators/simulator-1-customer-support/
uv run support_agent.py --case CS-02 --prompt prompts/system-noguard.md --tag noguard
```

What you should see

The prompt has lost its $500 rule, so the model tries $780. The hook denies it.

Open `simulators/simulator-1-customer-support/evidence/` and find it yourself.

The answer

A. A PreToolUse hook denies anything above $500 and redirects to escalation.

Now change one thing

Copy a file in cases/ to a new CS id, change the customer's message and expected disposition, rerun with --case, then score it with evaluate.py.
